

1.Chatbot for Customer Service

- Develop a rule-based or simple NLP-based chatbot for answering basic customer queries.
- Great for understanding basic NLP techniques and chatbot design.

Code:-

```
def chatbot():
```

```
    print("Customer Service Chatbot")
```

```
    print("Type 'bye' to exit\n")
```

```
    while True:
```

```
        user = input("You: ").lower()
```

```
        if user == "bye":
```

```
            print("Bot: Thank you for visiting.Bye!")
```

```
            break
```

```
        elif "hello" in user or "hi" in user:
```

```
            print("Bot: Hello! How can I assist you today?")
```

```
        elif "course" in user:
```

```
            print("Bot: We offer AI, Machine Learning and python for  
biotechnology")
```

```
        elif "fee" in user:
```

```
            print("Bot: Please contact our support team for fee details.")
```

```
        elif "duration" in user:
```

```
print("Bot: Most courses are completed within 1 to 6 months.")
```

```
elif "contact" in user:
```

```
    print("Bot: Email us at support@example.com")
```

```
else:
```

```
    print("Bot: Sorry, I couldn't understand your query.")
```

```
chatbot()
```
